(470) 302-9648

EDUCATION

Georgia Institute of Technology

Atlanta, GA

Dual B.S. in Computer Science & Mathematics; GPA: 3.95, Major GPA: 4.0

Aug 2019 – Dec 2023

Dual Enrolled: 2019 – 2020 (Part-Time), 2020 – 2021 (Full-Time)

Concentrations: Systems & Architecture, Machine Learning; Probability & Statistics

Courses: Processor Design, Operating Systems, Real Analysis, Automata Theory, Systems & Networks, Computer

Architecture, Machine Learning, Stochastic Processes, Algorithm Design, Numerical Analysis, Combinatorics

EXPERIENCE

D.E. Shaw & Co. – Systems/Core Infra

New York, NY

Software Engineering Intern

May 2022 – Aug 2022

Georgia Tech – College of Computing

Atlanta, GA

Lead Teaching Assistant for Algorithm Design

Jan 2022 – Present

- Taught algorithm design, recurrences, graph theory, and complexity theory to 200+ students
- Ensured course and student success by organizing assignments/exams and delegating work for other TAs
- Scribed lecture notes with \LaTeX for students (see github.com/adityaxdiwakar/cs3510-notes)
- Achieved 4.9/5 student rating through office hours, orchestrating fast grading turnarounds, and ensuring course transparency

Loganov Data

Remote

Operations/Research Head, Founder

Jun 2020 – Jul 2021

- Forecasted natural gas demand volatility with 92% accuracy through probabilistic/regressive models
- Ingested weather vendor data 84% faster than industry standard with low-level parallel processing
- Provided low-latency data reliably to hundreds of end-users with RESTful & GraphQL APIs

Code the Universe

Kansas City, KS

President, Board Member

Apr 2020 – Jul 2020

- Provided learning resources to ~2,500 students while managing 30 direct reports
- Rebuilt registration system with in-house course registrars resulting in 100% increased registrations
- Reduced redundant administrative oversight by 50% by implementing robust policies and processes

NetVPX Holdings LLC – Hosting

Boston, MA

VP of Technical Operations, CTO

Oct 2018 – Jul 2019

- Led initiative developing custom hosting provisioning tools and additional product SKUs
- Ensured 99.97% site reliability by maintaining and signing SLA obligations
- Recruited technical staff ensuring same hour ticket response time and smooth onboardings

PROJECTS

- **OCamlC-3:** Developed assembler for LC-3 assembly with custom lexing, parsing, and assembling using OCaml and Regex. Implemented CLI with outputs for lexed, parsed, and assembled states.
- **Open Exchange:** Implemented exchange suite with OCaml and NYSE FIX protocol supporting multiple order types; outperformed gold standard performance by profiling data structure designs with `ocamlprof`. Designed with versatility in mind using failsafe matching engines, cancel fairies, etc.
- **Flux:** Provided a developer friendly API to communicate with TD Ameritrade data provisioner using Go, Websockets, and a robust state machine. Built highly flexible translation units converting streamed message data into a requester/receiver data model. Achieved 100% tested code coverage.
- **Blueberry:** Exposed CQG data feed providing high-throughput low-latency top-level quote access. Consumed by endusers through various means such as RESTful or GraphQL APIs, or raw TCP/UDP sockets. Optimized for performance, capable of millions of daily message distributions.

SKILLS SUMMARY

Languages: Go, Python, Java, C/C++, OCaml, Rust, SQL, \LaTeX

Tools: Vim, Kubernetes, Docker, CI/CD, Sentry, Kafka, Nginx, Caddy

Infrastructure: Routing/Switching, Load Balancing, Proxying, Delivery Networks, Matching Engines

Finance: Futures, Options, Stochastics, Hypothesis Testing, Commodities, Volatility
